

be of "High Concern" of stock status.

## Factor 2.2 - Fishing Mortality

### JAPAN/NORTHWEST PACIFIC

Bottom Trawls | Japanese Flying Squid, Winter Cohort

#### Moderate Concern

Sea turtles are highly susceptible to interactions with trawls in most regions.

## Factor 2.3 - Discard Rate

### JAPAN/NORTHWEST PACIFIC

Bottom Trawls | Japanese Flying Squid, Winter Cohort

#### < 100%

There are no reliable data on discard rates and landings associated with the Japanese flying squid bottom trawl fisheries. But Japanese fishermen are allowed to keep all captured species and are known to retain species with market value, so it is possible that discard rates may be low.
