Best Choices

Buy first; they're well managed and caught or farmed responsibly.

Good Alternatives

Buy, but be aware there are concerns with how they're caught, farmed or managed.

Avoid

Take a pass on these for now; they're overfished, lack strong management or are caught or farmed in ways that harm other marine life or the environment.

Your Choices Matter

Many of the fish we enjoy are in trouble due to destructive fishing and farming practices.
